

***Acacia acinacea* - Gold Dust Wattle**

Height: 1 - 2m **Width:** 2 - 3m **Aspect:** Full sun to part shade.

Soil: Prefers well drained soils.

Comment: Open spreading shrub with bright yellow ball shaped flowers along branches.

***Acacia dealbata* - Silver Wattle**

Height: 6 - 30m **Width:** 5 - 10m **Aspect:** Full sun to part shade.

Soil: Easy to grow plant that likes deep moist soil.

Comment: Lemon ball shaped flowers. Butterfly attracting. Good plant for soil erosion control and screening.

***Acacia genistifolia* - Spreading Wattle**

Height: 1 - 3m **Width:** 1 - 3m **Aspect:** Full sun to part shade.

Soil: Will grow in all soil types.

Comment: Fast growing, open shrub with cream flowers. Prickly foliage makes it a good refuge for small birds.

***Acacia implexa* - Lightwood Wattle**

Height: 5 - 15m **Width:** 4 - 7m **Aspect:** Full sun to part shade.

Soil: Will grow in all soil types.

Comment: Fast growing upright small tree. Long lived plant that is good for screening and erosion control. Flowers cream balls.

***Acacia leprosa* - Cinnamon Wattle**

Height: 3 - 12m **Width:** 2 - 6m **Aspect:** Part shade to full shade.

Soil: Moist, well drained soils.

Comment: Medium shrub with dense weeping habit. Lemon ball shaped flowers. Good plant for screening.

***Acacia mearnsii* - Black Wattle**

Height: 8 - 25m **Width:** 6 - 10m **Aspect:** Full sun to full shade.

Soil: Prefers well drained soils.

Comment: Short lived tree that provides good shade. Cream ball shaped flowers in spring. Bird and butterfly attracting.

***Acacia melanoxylon* - Blackwood**

Height: 5 - 30m **Width:** 4 - 15m **Aspect:** Full sun to part shade.

Soil: Can adapt to most soil types. Can tolerate dry soils when mature.

Comment: Long lived tree which is good for shade and screening. Cream ball shaped flowers in late winter. Bird and butterfly attracting.

***Acacia myrtifolia* - Myrtle Wattle**

Height: 1 - 2m **Width:** 1 - 2m **Aspect:** Full sun to full shade.

Soil: Moist, well drained soils.

Comment: Fast growing small shrub. Good as a low screen. Can be pruned if required. Yellow ball shaped flowers. Bird attracting.

***Acacia paradoxa* - Hedge Wattle**

Height: 2 - 4m **Width:** 2 - 5m **Aspect:** Full sun to part shade.

Soil: Can adapt to most soil types.

Comment: Dense shrub, good for screening. Gold ball shaped flowers. Sharp thorns on branches. Good refuge for small birds.

***Acacia pycnantha* - Golden Wattle**

Height: 3 - 10m **Width:** 2 - 5m **Aspect:** Full sun to part shade.

Soil: Well drained soil

Comment: Fast growing, drought resistant tree. Good for screening and as a windbreak. Bird attracting. Australian national floral emblem.

***Acacia stricta* - Hop Wattle**

Height: 2 - 5m **Width:** 2 - 4m **Aspect:** Full sun to full shade.

Soil: Will grow in all soil types.

Comment: Quick growing tree good for screening and as a windbreak. Pale yellow ball shaped flowers. Bird attracting.

***Acacia verniciflua* - Varnish Wattle**

Height: 3 - 5m **Width:** 3 - 5m **Aspect:** Full sun to part shade.

Soil: Will grow in all soil types.

Comment: Quick growing tree good for screening and as a windbreak. Pale to bright yellow ball shaped flowers. Bird attracting.

***Acacia verticillata* - Prickly Moses**

Height: 2 - 6m **Width:** 3 - 5m **Aspect:** Part shade.

Soil: Will grow in all soil types.

Comment: Variable open shrub with fine very sharp thorns along branches. Good refuge for small birds. Flowers are pale yellow balls.

***Acaena echinata* - Sheep's Burr**

Height: 30cm **Width:** 30cm **Aspect:** Full sun to part shade.

Soil: Prefers moist soil.

Comment: Perennial plant with erect stems. Tiny dark purple flowers. Mature seed pods of this plant form burrs.

***Acaena novae-zelandiae* - Bidgee Widgee**

Height: Prostrate **Width:** 1 - 4m **Aspect:** Full sun to full shade.

Soil: Will grow in all soil types.

Comment: Ground cover with burrs. Erosion control as helps bind soils.

***Acaena ovina* - Aust. Sheep's Burr**

Height: 10 - 50cm **Width:** 30cm **Aspect:** Full sun to part shade.

Soil: Will grow in moist to dry soils.

Comment: Grows as a tuft with green burrs.

***Adiantum aethiopicum* - Maidenhair**

Height: 10 - 45cm **Width:** spreading **Aspect:** Part shade.

Soil: Prefers moist soils.

Comment: Ground cover, fern with underground rhizomes.

***Alisma plantago-aquatica* - Water Plantain**

Height: 0.5 - 1m **Width:** 50cm **Aspect:** Full sun to part shade.

Soil: Prefers moist to wet soils. POND plant.

Comment: Bog plant with tiny pale pink 3-petaled flowers.

***Allocasuarina littoralis* - Black Sheoke**

Height: 4 - 8m **Width:** 2 - 5m **Aspect:** Full sun to part shade.

Soil: Prefers well-drained soils.

Comment: Small tree with fine branchlets.

***Allocasuarina verticillata* - Drooping Sheoke**

Height: 4 - 11m **Width:** 3 - 6m **Aspect:** Full sun.

Soil: Well drained soils.

Comment: Small tree with drooping branchlets.

***Anthosacne scabra* - Common Wheat Grass**

Height: 20 - 50cm **Width:** 20 - 40cm **Aspect:** Full sun to part shade.

Soil: Prefers well-drained soils.

Comment: Clumping grass for all garden soils.

***Arthropodium milleflorum* - Vanilla Lily**

Height: 30 - 80cm **Width:** 30cm **Aspect:** Full sun to part shade.

Soil: Prefers moist clay soils.

Comment: Good plant for mass planting or for in containers. Plants die back to tubers in the dry season.

***Arthropodium strictum* - Chocolate Lily**

Height: 30 - 80cm **Width:** 60cm **Aspect:** Full sun to part shade.

Soil: Prefers dry, well-drained soils.

Comment: Good plant for rockeries or for mass planting.

***Atriplex semibaccata* - Creeping Saltbush**

Height: 10 - 30cm **Width:** 1 - 3m **Aspect:** Full sun to part shade.

Soil: Prefers well drained soils.

Comment: Useful ground cover and for soil erosion control.

***Austrostipa elegantissima* - Feather Spear Grass**

Height: 80cm

Width: 50cm

Aspect: Full sun to part shade.

Soil: Prefers open soils.

Comment: Tussock grass with cane-like stems and very elegant flower heads.

***Austrostipa mollis* - Soft Spear Grass**

Height: 80cm **Width:** 30cm **Aspect:** Full sun to part shade.

Soil: Will grow in moist to dry soils.

Comment: Robust, erect tufted grass. Useful as an accent plant. Tips of florets can be sharp.

***Austrostipa pubinodis* - Spear Grass**

Height: 80cm

Width: 35cm

Aspect: Part shade.

Soil: Prefers moist soils.

Comment: Tufted grass with seed stems to 1.5m tall. Drift through trees. Use as an accent plant in shady gardens.

***Austrostipa rudis* - Veined Spear Grass**

Height: 40cm **Width:** 40cm **Aspect:** Full sun to part shade.

Soil: Will grow in moist to dry soils.

Comment: Tufted grass with seed stems to 1.2m tall. Drift through trees. Use as an accent plant in shady gardens.

***Austrostipa scabra ssp. falcata* - Slender Spear Grass**

Height: 50cm **Width:** 15cm **Aspect:** Full sun to full shade.

Soil: Prefers light, well-drained soils.

Comment: Graceful small grass. Used in rockeries.

Banksia spinulosa var. cunninghamii - Hairpin
Banksia

Height: 5m **Width:** 4m **Aspect:** Full sun to part shade.

Soil: Prefers moist, well drained soils.

Comment: Screening shrub. Can plant under eucalypts.

***Baumea articulata* - Jointed Twig Rush**

Height: 1 - 2m **Width:** 1m **Aspect:** Full sun to part shade.

Soil: Prefers moist to wet soils. POND plant.

Comment: Tall erect tussock. Around edges of ponds and in water. Also in bog gardens. Good habitat for waterbirds

***Billardiera mutabilis* - Apple Berry**

Height: 30cm

Width: 1m

Aspect: Full sun to full shade.

Soil: Will grow in dry to moist soils.

Comment: Light climber. Bell flowers turn into edible berries.

***Bolboschoenus caldwellii* - Sea Club Rush**

Height: 90cm

Width: 50m

Aspect: Full sun to part shade.

Soil: Will grow in moist to wet soils.

Comment: Semi aquatic plant with leafy stems. Good stands in ponds.

***Bossiaea prostrata* - Creeping Bossiaea**

Height: prostrate **Width:** 0.5 - 1.5m **Aspect:** Full sun to full shade.

Soil: Prefers well drained soils

Comment: Trailing understorey plant that can also grow well in tubs.

***Brachyscome multifida var. multifida* - Cut-Leaf Daisy**

Height: 0.2 - 1m **Width:** 10 - 40cm **Aspect:** Full sun to part shade.

Soil: Prefers moist clay soils to well drained soils.

Comment: Attractive plant for rockeries, containers, and borders.

***Brunonia australis* - Blue Pincushion**

Height: 10 - 50cm **Width:** 10 -15cm **Aspect:** Full sun to part shade.

Soil: Prefers moist to well drained soils.

Comment: Very attractive mass planting in rockeries, under trees, and in containers.

***Bulbine bulbosa* - Bulbine Lily**

Height: 20 - 50cm **Width:** 30cm **Aspect:** Full sun to part shade.

Soil: Prefers moist to well drained soils.

Comment: Attractive mass planting in rockeries and cottage gardens.

***Bursaria spinosa var. spinosa* - Sweet Bursaria**

Height: 2 - 6m **Width:** 2 - 3m **Aspect:** Full sun to part shade.

Soil: Prefers well drained soils.

Comment: Small tree which can be pruned for a bushy look. Plant has sharp spines. Is an attractive plant when in flower and fruit.

***Caesia parviflora var. parviflora* - Pale Grass Lily**

Height: 10 - 30cm **Width:** 10 - 25cm **Aspect:** Full sun to part shade.

Soil: Prefers moist to well drained soils.

Comment: Dainty rockery or cottage garden plant. Best effect when planted in drifts

***Callistemon sieberi* - River Bottlebrush**

Height: 3 - 10m **Width:** 2 - 6m **Aspect:** Full sun to part shade.

Soil: Prefers moist soils. Will tolerate dryness when established.

Comment: Attractive screening plant with cream coloured bottlebrush. Good habitat plant for wildlife.

***Calystegia sepium* - Large Bindweed**

Height: climber **Width:** 1 - 4m **Aspect:** Part shade.

Soil: Prefers wet areas.

Comment: Climber for wet, shady areas. Pink flowers.

***Carex appressa* - Tall Sedge**

Height: 0.5 - 1.2m **Width:** 1m

Aspect: Full sun.

Soil: Prefers moist area.

Comment: Great wildlife habitat plant. Stabilizes creek banks. Moist garden areas.

***Carex fascicularis* - Tassel Sedge**

Height: 0.5 - 1m **Width:** 50 - 70cm **Aspect:** Full to part shade.

Soil: Prefers moist soils.

Comment: A bright sedge with tassel flowers for a shady, moist aspect.

***Carex tereticaulis* - Common Sedge**

Height: 1m

Width: 1m

Aspect: Full sun to part shade.

Soil: Prefers moist areas.

Comment: A great plant for around ponds. Very useful for revegetation of waterways.

***Cassinia aculeata* - Dogwood**

Height: 2 - 4m **Width:** 1 - 2m **Aspect:** Full sun.

Soil: Prefers heavy to moist soils.

Comment: Understorey shrub. White clustered flowers. Prune to shape.

***Cassinia arcuata* - Drooping Cassinia**

Height: 1 - 3m **Width:** 1 - 2m **Aspect:** Full sun to part shade.

Soil: Prefers poor dry soils.

Comment: Weeping shrub for dry, hard to grow areas. Understorey shrub.

***Cassinia longifolia* - Long-Leaf Cassinia**

Height: 2 - 4m **Width:** 2 - 3m **Aspect:** Full to part shade.

Soil: Prefers moist, rocky, well drained soils.

Comment: Adaptable shrub. White cauliflower head shaped flowers.
Curry fragrance.

***Centella cordifolia* - Swamp Pennywort**

Height: prostrate **Width:** 1 - 2m **Aspect:** Full sun to part shade.

Soil: Prefers moist to wet soils.

Comment: Bog areas, besides pools as a matting plant. Pinkish flowers.

***Centipeda cunninghamii* - Common Sneezeweed**

Height: 10 - 50cm **Width:** 30cm

Aspect: Full sun to part shade.

Soil: Prefers moist soils.

Comment: Bog areas and beside ponds. Flower heads of tiny flowers.

***Chrysocephalum apiculatum* - Common Everlasting Buttons**

Height: prostrate **Width:** 0.3 - 1m **Aspect:** Full sun.

Soil: Prefers well drained soils.

Comment: Excellent rockery or ground cover plant with bright yellow flower display.

***Chrysocephalum semipapposum* - Clustered Everlasting**

Height: 80cm **Width:** 1m **Aspect:** Full sun to part shade.

Soil: Will grow in moist soils. Drought tolerant when established.

Comment: Attractive garden plant creating swathes of golden flowers.

***Clematis aristata* - Old Man's Beard**

Height: climber **Width:** 15m **Aspect:** Full sun to part shade.

Soil: Prefers moist soils.

Comment: A vigorous but beautiful climber for pergolas and trellis.

Can be pruned.

***Coprosma quadrifida* - Prickly Currant Bush**

Height: 2 - 4m **Width:** 1 - 1.5m **Aspect:** Full to part shade.

Soil: Prefers moist to well drained soils.

Comment: Prickly habitat plant with edible red berries. Grows well with ferns.

***Coronidium scorpioides* - Button Everlasting**

Height: 30cm **Width:** 30cm **Aspect:** Full sun to part shade.

Soil: Prefers moist to well-drained soils

Comment: Matting plant for cottage gardens, rockeries & borders.

***Correa glabra* - Smooth or Rock Correa**

Height: 1 - 3m **Width:** 1 - 3m **Aspect:** Full sun to full shade.

Soil: Prefers well-drained soils.

Comment: Attractive screening shrub. Pale green/lemon bell shaped flowers over long flowering season produce nectar for birds and bees.

***Correa reflexa* - Native Fuchsia - green form**

Height: 1 - 2m **Width:** 0.5 - 2m **Aspect:** Full sun to full shade.

Soil: Prefers well drained to drier soils.

Comment: Dry shady position. Green bell shaped flowers bloom in winter providing nectar for birds and bees.

***Correa reflexa* - Native Fuchsia - red form**

Height: 1 - 2m **Width:** 0.5 - 2m **Aspect:** Full sun to full shade.

Soil: Prefers well drained to drier soils.

Comment: Dry shady position. Red bell shaped flowers bloom in winter providing nectar for birds and bees.

***Craspedia variabilis* - Common Billy Buttons**

Height: 50 - 80cm **Width:** 30 - 50cm **Aspect:** Full sun to part shade.

Soil: Prefers moist soils.

Comment: Spectacular in mass planting for semi-shady conditions.

***Crassula helmsii* - Swamp Stonecrop**

Height: 10 - 30cm **Width:** 10 - 30cm **Aspect:** Full sun.

Soil: Prefers moist to boggy conditions. POND plant.

Comment: Pond plant. Grows around edge or in ponds. Forms a dense mat.

***Cyperus lucidus* - Leafy Flat-Sedge**

Height: 0.5 - 1.5m **Width:** 50cm **Aspect:** Full sun to full shade.

Soil: Prefers moist to swampy conditions.

Comment: A spreading sedge for low, moist sites in garden and besides ponds.

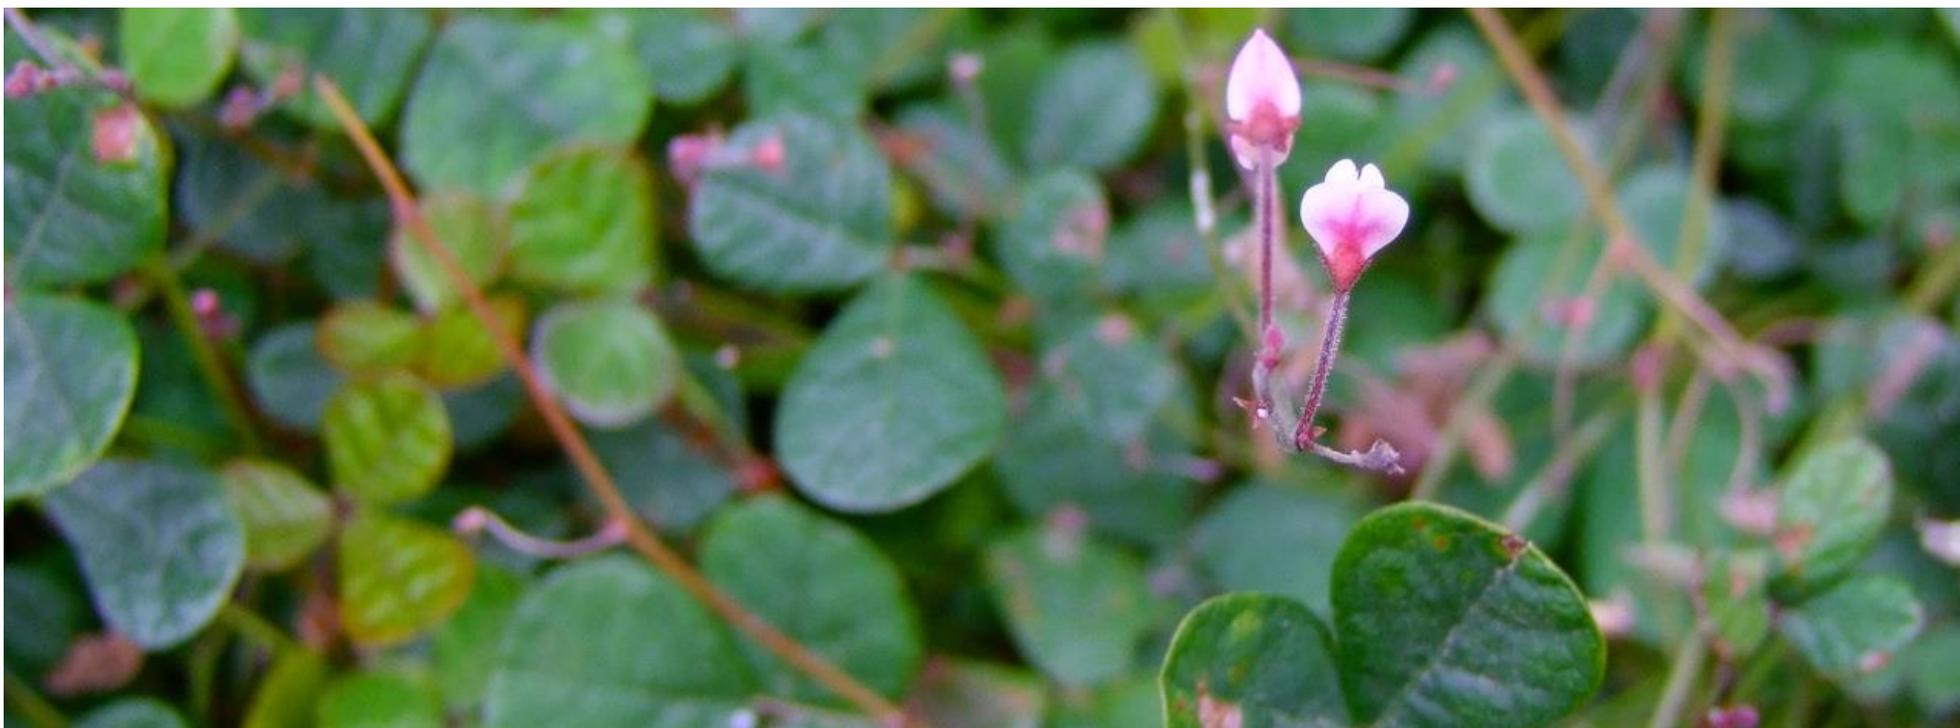

***Daviesia leptophylla* - Slender Bitter-Pea**

Height: 1 - 2m **Width:** 1 - 2m **Aspect:** Full sun to part shade.

Soil: Prefers dry, well drained soils.

Comment: Gives a natural look to gardens with mass plantings. Will grow under eucalyptus.

***Desmodium gunnii* - Southern Tick-Trefoil**

Height: 1 - 2m **Width:** 20 - 50cm **Aspect:** Full to part shade.

Soil: Prefers moist soils.

Comment: A light scrambler that can form mats under trees.

***Dianella laevis* - Pale Flax-Lily**

Height: 50 - 80cm **Width:** 50cm **Aspect:** Full sun to part shade.

Soil: Prefers moist to well-drained soils.

Comment: An attractive clumping habitat plant. Good under trees.

***Dianella revoluta* - Black Anther Flax-Lily**

Height: 0.5 - 1m **Width:** 1 - 2m **Aspect:** Full sun to part shade.

Soil: Prefers well-drained soils.

Comment: Can grow close to trees. Is a tolerant plant with strappy foliage.

***Dianella tasmanica* - Tasman Flax-Lily**

Height: 0.6 - 1.5m **Width:** 0.5 - 2m **Aspect:** Full sun to full shade.

Soil: Prefers moist soils. Cool position.

Comment: Attractive, robust clumping plant. Good under trees.

***Dichelachne crinita* - Long-Hair Plume Grass**

Height: 50 - 80cm **Width:** 30 - 40cm **Aspect:** Full sun to part shade.

Soil: Prefers well-drained soils.

Comment: Attractive, ornamental tufted grass. Grass plumes in spring.

***Dichondra repens* - Kidney Weed**

Height: Prostrate **Width:** **Aspect:** Full sun to part shade.

Soil: Prefers moist to dry and well-drained soils.

Comment: Excellent groundcover creating a dense mat in moist, shady areas.

***Dodonaea viscosa ssp. spatulata* - Wedge-Leaf Hop Bush**

Height: 1 - 3m **Width:** 1 - 3m **Aspect:** Full sun to part shade.

Soil: Prefers well-drained soils.

Comment: Hardy shrub with showy, red, papery capsules.

***Doodia australis* - Common Rasp Fern**

Height: 30 - 60cm **Width:** 30 - 50cm **Aspect:** Full to part shade.

Soil: Prefers moist, rich soils.

Comment: Neat fern groundcover for ferneries, embankments and containers.

***Einadia nutans ssp. nutans* - Climbing Saltbush**

Height: 30cm

Width: 1.2m

Aspect: Full sun to part shade.

Soil: Tolerates dry soils.

Comment: Useful groundcover with red berries. Good in rockeries.
Will not tolerate foot traffic.

***Eleocharis acuta* - Common Spike Rush**

Height: 90cm **Width:** 30cm **Aspect:** Full sun to part shade.

Soil: Prefers wet areas, ponds, and lakes. POND plant.

Comment: Water plant that provides habitat in dams and ponds.

***Eleocharis sphacelata* - Tall Spike Rush**

Height: 5m

Width: 2m

Aspect: Full sun to part shade.

Soil: Prefers deep water. POND plant.

Comment: Bird and fish habitat in large water areas such as dams and lakes.

***Enchylaena tomentosa* - Ruby Saltbush**

Height: prostrate **Width:** 1m **Aspect:** Full sun to part shade.

Soil: Very adaptable to all conditions.

Comment: Attractive groundcover with red berries. Will not tolerate foot traffic.

***Epacris impressa* - Common Heath**

Height: 0.5 - 1.5m **Width:** 60cm **Aspect:** Part shade.

Soil: Prefers moist, well-drained soils.

Comment: Beautiful white or occasionally pink bells. Plant en mass.
Small gardens, rockeries, shady aspect.

***Epacris impressa* - Common Heath - Pink**

Height: 0.5 - 1.5m **Width:** 60cm **Aspect:** Part shade.

Soil: Prefers moist, well-drained soils.

Comment: Beautiful white or occasionally pink bells. Plant en mass. Small gardens, rockeries, shady aspect.

***Eryngium ovinum* - Blue Devil**

Height: 10 - 60 cm **Width:** 10 - 50 cm **Aspect:** Full sun.

Soil: Prefers moist, well drained soils.

Comment: Decorative prickly plant for rockeries and pots.

***Eucalyptus baxteri* - Brown Stringybark**

Height: 3 - 40m **Width:** 4 - 20m **Aspect:** Full sun.

Soil: Prefers well drained soils in damp or valley areas.

Comment: Variable medium sized tree with rounded crown. Good shelter and shade tree.

***Eucalyptus camaldulensis* - River Red Gum**

Height: 15 - 40m **Width:** 10 - 50m **Aspect:** Full sun.

Soil: Prefers moist soils.

Comment: Large spreading tree. Good honey tree. Will drop large branches.

***Eucalyptus cephalocarpa* - Silver Leaf Stringy Bark.**

Height: 8 - 20m **Width:** 5 - 15m **Aspect:** Full sun to part shade.

Soil: Prefers moist soils.

Comment: This medium sized tree has a dense canopy. Good under powerlines.

***Eucalyptus globoides* - White Stringybark**

Height: 10 - 30m **Width:** 8 - 20m **Aspect:** Full sun to part shade.

Soil: Prefers moist soils.

Comment: Upright tree with stringy bark on main trunk and larger branches. Compact canopy.

***Eucalyptus goniocalyx* - Long-Leaved Box**

Height: 8 - 20m **Width:** 6 - 15m **Aspect:** Full sun to part shade.

Soil: Tolerates poor soils.

Comment: Long shiny green adult leaf. Coarse, tough bark.

***Eucalyptus leucoxylon ssp. connata* - Yellow Gum**

Height: 10 - 20m **Width:** 6 - 20m **Aspect:** Full sun to part shade.

Soil: Tolerates poor soils.

Comment: Large tree with spreading canopy. Rough bark at base giving way to smooth yellow bark above.

***Eucalyptus macrorhyncha* - Red Stringy Bark**

Height: 10 - 35m **Width:** 10 - 20m **Aspect:** Full sun to part shade.

Soil: Prefers moist, but not wet, soils.

Comment: Upright tree with thick canopy, making it an excellent shade and windbreak tree. Has thick red/brown bark.

***Eucalyptus melliodora* - Yellow Box**

Height: 10 - 30m **Width:** 8 - 25m **Aspect:** Full sun to part shade.

Soil: Prefers well drained soils.

Comment: Attractive tree with light green/greyish narrow, long leaves.

***Eucalyptus microcarpa* - Grey Box**

Height: 10 - 25m **Width:** 8 - 25m **Aspect:** Full sun.

Soil: Prefers heavy soils.

Comment: Smallish spreading tree. Good for shade, as a windbreak, and a honey tree.

***Eucalyptus obliqua* - Messmate**

Height: 40 - 70m **Width:** 10 - 35m **Aspect:** Full sun to part shade.

Soil: Prefers moist, well drained soils

Comment: Tall, upright tree with a dense canopy. Good for honey and shelter.

***Eucalyptus ovata* - Swamp Gum**

Height: 8 - 30m **Width:** 8 - 20m **Aspect:** Full sun to part shade.

Soil: Prefers moist soils

Comment: Shady tree in swampy areas. Good source of food for koalas.

***Eucalyptus polyanthemos ssp. vestita* - Red Box**

Height: 7 - 25m **Width:** 5 - 15m **Aspect:** Full sun to part shade.

Soil: Tolerates poor soils.

Comment: Smallish medium tree with dense crown, crooked trunk, and ornamental foliage. Flowers profusely and is a good honey tree.

***Eucalyptus radiata ssp. radiata* - Narrow Leaf Peppermint**

Height: 10 - 30m **Width:** 6 - 20m **Aspect:** Full sun to part shade.

Soil: Prefers well drained soils.

Comment: Graceful upright tree. Leaves are distilled for eucalyptus oil.

***Eucalyptus rubida ssp. rubida* - Candlebark**

Height: 10 - 25m **Width:** 10 - 20m **Aspect:** Full sun to part shade.

Soil: Prefers drier soils.

Comment: Decorative shade tree. Good for honey bees and koalas.

***Eucalyptus viminalis* - Manna Gum**

Height: 20 - 50m **Width:** 8 - 15m **Aspect:** Full sun.

Soil: Adaptable to most soil types.

Comment: Opened crown tree. Good for honey bees and koalas.
Also used for its timber.

***Ficinia nodosa* - Knobby Club Rush**

Height: 0.5 - 1.5m **Width:** 0.6 - 2m **Aspect:** Full sun to part shade.

Soil: Prefers moist soils but will tolerate dry periods.

Comment: Hardy, fast growing. Grow around water features.

***Gahnia sieberiana* - Red Fruited Saw Sedge**

Height: 1.5 - 3m **Width:** 2 - 3m **Aspect:** Full sun to full shade.

Soil: Prefers soils that are moist for most of the year.

Comment: Wet area plant. Excellent habitat plant.

***Geranium sp.2* - Austral Crane's Bill**

Height: 40cm **Width:** 0.5 - 1m **Aspect:** Part shade.

Soil: Some moisture is required all year round.

Comment: A bright, hardy rockery plant.

***Glycine clandestina* - Twining Glycine**

Height: 20cm **Width:** 0.5 - 2m **Aspect:** Full to part shade.

Soil: Prefers moist, well drained soils.

Comment: A gentle twiner for shady gardens.

***Glycine tabacina* - Vanilla Glycine**

Height: 20cm **Width:** 0.5 - 2m **Aspect:** Full sun to part shade.

Soil: Prefers well drained to dryer soils.

Comment: Attractive light scrambler for dryer gardens.

***Goodenia ovata* - Hop Goodenia**

Height: 1 - 2m **Width:** 1 - 2 m **Aspect:** Full sun to full shade.

Soil: Prefers moist to well drained soils.

Comment: Lovely shrub in garden. Good habitat plant.

***Goodia lotifolia* - Golden Tip Goodia**

Height: 1 - 5m **Width:** 1 - 5m **Aspect:** Full sun to part shade.

Soil: Prefers well drained soils.

Comment: Shrub is very showy when in flower. Prune after flowering to maintain bushy shape.

***Gynatrix pulchella* - Hemp Bush**

Height: 2 - 4 m **Width:** 1 - 3m **Aspect:** Part shade.

Soil: Prefers well drained, moist soils.

Comment: Fragrant and profuse in flowering.

***Hakea decurrens ssp. physocarpa* - Bushy Needlewood**

Height: 0.8 - 4 m **Width:** 1 - 3m **Aspect:** Full sun to part shade.

Soil: Prefers moist to dry clay soils.

Comment: Tough erect shrub with sharp prickly needles. Habitat plant for birds and butterflies.

***Hakea nodosa* - Yellow Hakea**

Height: 1 - 3m **Width:** 1 - 2 m **Aspect:** Full sun to full shade.

Soil: Prefers moist to wet clay soils. Will tolerate some dry.

Comment: Erect shrub with needle like foliage. Makes a good screen plant. Adapts to dry positions.

***Hakea ulicina* - Furze Hakea**

Height: 1 - 3m **Width:** 1 - 2m **Aspect:** Full sun to part shade.

Soil: Will grow in dry to moist soils.

Comment: Upright shrub with needle like leaves. Interesting landscape feature plant.

***Hardenbergia violacea* - Purple Coral Pea**

Height: scrambler **Width:** up to 2m **Aspect:** Full sun to part shade.

Soil: Prefers well drained soils.

Comment: Showy scrambler and trellis climber.

***Hydrocotyle laxiflora* - Stinking Pennywort**

Height: 10 - 40cm **Width:** 1 - 2m **Aspect:** Part to full shade.

Soil: Prefers dryish soils.

Comment: Spreading ground cover for shady area. Plant has a strong odour. Makes a good habitat plant for frogs.

***Indigofera australis* - Austral indigo**

Height: 1 - 2m **Width:** 1 - 2m **Aspect:** Full sun to full shade.

Soil: Prefers well-drained soils.

Comment: Sprays of purple pea flowers. Under scrub. Prune to shape.

***Juncus amabilis* - Hollow Rush**

Height: 1m **Width:** 50cm **Aspect:** Full sun to part shade.

Soil: Prefers moist soils, will tolerate some dry times.

Comment: Tufted rush with blue/green stems. Excellent habitat plant in wet areas

***Juncus gregiflorus* - Green Rush**

Height: 0.6 - 1.5m **Width:** 0.5 - 1.4m **Aspect:** Part shade.

Soil: Prefers moist to wet soils.

Comment: Tufted rush with bright green stems. Good habitat plant for frogs and birds.

***Juncus holoschoenus* - Joint-leaf rush**

Height: 20 - 90cm **Width:** 10 40cm **Aspect:** Full sun to part shade.

Soil: Prefers moist to wet soils.

Comment: Rush with hollow leaves. Can spread easily.

***Juncus pallidus* - Pale rush**

Height: 2m

Width: 1m

Aspect: Full sun to part shade.

Soil: Prefers moist to wet soils.

Comment: Robust tufted rush for wet areas and ponds.

***Juncus pauciflorus* - Loose Flower Rush**

Height: 1m **Width:** 60cm **Aspect:** Full shade.

Soil: Prefers moist soils, can tolerate some dry times.

Comment: A delicate rush for wet/shady areas.

***Juncus planifolius* - Broad-Leaf Rush**

Height: 10 - 50cm **Width:** 10 - 30cm **Aspect:** Full sun to part shade.

Soil: Prefers moist to wet soils.

Comment: Interesting little rush for around water features.

***Juncus sarophorus* - Broom Rush**

Height: 1 - 2m **Width:** 0.5 - 1m **Aspect:** Full shade.

Soil: Prefers a semi-aquatic environment.

Comment: Good rush for a water feature. Prefers to be wet most of the time.

***Juncus subsecundus* - Finger Rush**

Height: 0.5 - 1m **Width:** 0.5 - 1m **Aspect:** Full sun to part shade.

Soil: Prefers moist soils, tolerates dry for short period.

Comment: Tufted rush with smooth dull blue/green stems.

***Kennedia prostrata* - Running Postman**

Height: trailing ground cover.

Aspect: Full sun to part shade.

Soil: Prefers well drained.

Comment: Attractive groundcover for embankments, containers.

***Kunzea leptospermoides* - Burgan**

Height: 2 - 5m **Width:** 2 - 4m **Aspect:** Full sun to part shade.

Soil: Adaptable, will grow in moist to dry soils.

Comment: Fast growing, weeping form, good screen and habitat plant.

***Lagenophora gracilis* - Slender Bottle Daisy**

Height: 25cm **Width:** 8cm **Aspect:** Full sun to part shade.

Soil: Prefers moist, well-drained soils.

Comment: Small herb with flat leaves and tiny daisy like flowers.
Good for containers and under trees.

***Lagenophora stipitata* - Blue Bottle Daisy**

Height: 25cm **Width:** 8cm **Aspect:** Full sun to part shade.

Soil: Adaptable, will grow in moist to dry soils

Comment: Small herb with flat leaves and dainty daisy like flowers.
Good groundcover plant that forms small colonies.

***Lepidosperma laterale var. laterale* - Variable Sword Sedge**

Height: 0.4 - 1.5m **Width:** 1.5m **Aspect:** Part shade.

Soil: Very adaptable, will grow in most soil types.

Comment: Adaptable feature plant. This sedge has sharp edges on its leaves.

***Leptorhynchos squamatus* - Scaly Buttons**

Height: 40cm **Width:** 15 - 30cm **Aspect:** Full sun to part shade.

Soil: Prefers well-drained, moist soils.

Comment: Small spreading herb that is good in rockeries, containers, and cottage gardens. Will need watering over summer.

***Leptorhynchos tenuifolius* - Wiry Buttons**

Height: 10 - 40cm **Width:** 30cm

Aspect: Full sun to part shade.

Soil: Prefers well-drained soils.

Comment: Small spreading herb that is good in rockeries, containers, and cottage gardens.

***Leptospermum continentale* - Prickly Tea-Tree**

Height: 1 - 4m **Width:** 1 - 2m **Aspect:** Full sun to part shade.

Soil: Adaptable, will grow in most soil types.

Comment: Rigid upright scrub or small tree with prickly leaves.
Excellent habitat plant. Very Floriferous.

***Leptospermum lanigerum* - Woolly Tea-Tree**

Height: 2 - 3m **Width:** 1 - 3m **Aspect:** Full sun to part shade.

Soil: Prefers moist conditions.

Comment: An attractive tall shrub or small tree with flaking bark.
Makes a good screen plant if pruned.

***Leptospermum obovatum* - River Tea-Tree**

Height: 2 - 3m **Width:** 1 - 3m **Aspect:** Full sun to part shade.

Soil: Prefers moist conditions.

Comment: Ornamental dense erect shrub with rounded tee-tree leaves and attractive flowers. Likes to be pruned.

***Leucochrysum albicans* - Hoary Sunray**

Height: 10 - 30cm **Width:** 30cm

Aspect: Full sun to part shade.

Soil: Prefers well-drained soils.

Comment: Dense perennial herb with long hairy grey leaves. Attractive rockery or container plant. Beautiful dried flowers.

***Linum marginale* - Native Flax**

Height: 30 - 70cm **Width:** 30cm **Aspect:** Full sun to part shade.

Soil: Prefers moist, well-drained soils.

Comment: Willowy herb for rockeries, cottage gardens and under trees.

***Lobelia anceps* - Angled Lobelia**

Height: 30cm **Width:** prostrate **Aspect:** Full sun to part shade.

Soil: Prefers moist soils.

Comment: Erect perennial herb with small blue fan shaped flowers.
Good for bog gardens and wet areas.

***Lomandra filiformis ssp. filiformis* - Wattle Mat-Rush**

Height: 15 - 25cm **Width:** 20cm **Aspect:** Full sun to part shade.

Soil: Prefers moist to drier soils.

Comment: Tufted grass like perennial. Ideal in rockeries, as a border, or in small areas.

***Lomandra longifolia* - Spiny-Headed Mat-Rush**

Height: 0.5 - 1.2m **Width:** 0.5 - 1m **Aspect:** Full sun to part shade.

Soil: Prefers well-drained soils.

Comment: Large tussock-like plant. Excellent for landscaping and habitat for insects, small animals. Grows under established trees.

***Lycopodium australis* - Australian Gypsywort**

Height: 1 - 1.5m **Width:** 20 - 50 cm **Aspect:** Part to full shade.

Soil: Prefers moist to wet soils.

Comment: Interesting plant for wet areas. Frog habitat.

***Lythrum salicaria* - Purple Loosestrife**

Height: 1 - 2 m **Width:** 1 m **Aspect:** Full sun.

Soil: Prefers moist soils.

Comment: Attractive wetland plant with masses of purple flowers.

***Marsilea drummondii* - Common Nardoo**

Height - Width: spreading cover **Aspect:** Full sun to part shade.

Soil: Prefers boggy soil. POND plant.

Comment: Four leaf clover patterned leaf. Spreading pond plant.

***Mazus pumilio* - Swamp Mazus**

Height: 5cm **Width:** 0.5 - 1m **Aspect:** Full sun to full shade.

Soil: Prefers moist to wet soils.

Comment: Suckering to make an attractive carpet in moist areas.

***Melaleuca ericifolia* - Swamp Paperbark**

Height: 4 - 9m **Width:** 2 - 6m **Aspect:** Full sun to part shade.

Soil: Prefers moist soils.

Comment: Screening plant when pruned. Prolific flowering habitat tree.

***Melaleuca parvistaminea* - Rough-Barked Honey-Myrtle**

Height: 2 - 4 m **Width:** 3 - 5m **Aspect:** Full sun to part shade.

Soil: Prefers moist soils.

Comment: Medium shrub with cream brush type flowers and rough bark.

***Melicytus dentatus* - Tree Violet**

Height: 2 - 4m **Width:** 1 - 2m **Aspect:** Full sun to part shade.

Soil: Prefers well-drained soils.

Comment: Beautiful fragrant bell shape flowers. Bird attracting.
Responds to watering.

***Mentha australis* - River Mint**

Height: 0.2 - 1m **Width:** 20 - 80cm **Aspect:** Full sun to part shade.

Soil: Prefers moist to wet soils.

Comment: An aromatic plant for moist areas.

***Microlaena stipoides* - Weeping Grass**

Height: 2 - 20cm **Width:** spreading **Aspect:** Full sun to part shade.

Soil: Prefers moist to well-drained soils.

Comment: Excellent for lawn in a shady site.

***Microseris sp.3* - Yam Daisy**

Height: 15 - 25cm **Width:** prostrate **Aspect:** Part shade.

Soil: Prefers well-drained soils.

Comment: Tufted perennial herb with a single yellow daisy on long stalk. Plant together for a colourful display. Tubers can be eaten.

***Montia australasica* - White Purslane**

Height: prostrate **Width:** spreading **Aspect:** Full sun to part shade.

Soil: Prefers moist to wet soils. POND plant.

Comment: A pretty little creeper for pond edges.

***Myoporum petiolatum* - Sticky Boobialla**

Height: 0.5 - 2m **Width:** 1 - 2m **Aspect:** Full shade.

Soil: Prefers drier soils to well drained soils.

Comment: Dense shrub with clusters of white flowers. Drought tolerant.

***Myriophyllum crispatum* - Water-Milfoil**

Height: 25 - 60cm **Width:** **Aspect:** Full sun to part shade.

Soil: Requires wet areas, ponds, or slow flowing water. POND plant.

Comment: Used in and around large pools and wet areas.

***Nicotiana suaveolens* - Native Tobacco**

Height: 0.5 - 1m **Width:** 40cm **Aspect:** Full sun shade.

Soil: Prefers well drained to dry soils.

Comment: Good pot plant. Scented. Suits mass planting.

***Olearia lirata* - Snowy Daisy-Bush**

Height: 2 - 4m **Width:** 2 - 3m **Aspect:** Part to full shade.

Soil: Prefers moist to well drained soils.

Comment: Very floriferous, attractive, shade plant. Light screen.

***Olearia myrsinoides* - Silky Daisy-Bush**

Height: 0.5 - 1.5m **Width:** 1 - 1.5m **Aspect:** Full sun to part shade.

Soil: Prefers well-drained soils.

Comment: Adaptable. Good for small gardens. Flowers well displayed.

***Olearia ramulosa* var. *ramulosa* - Twigggy Daisy-Bush**

Height: 0.5 - 2m **Width:** 1 - 1.5m **Aspect:** Full sun to part shade.

Soil: Prefers well-drained soils.

Comment: Can be planted under existing trees. Prune to encourage flowers.

***Ozothamnus ferrugineus* - Tree Everlasting**

Height: 2 - 5m **Width:** 2 - 4m **Aspect:** Full sun to part shade.

Soil: Prefers moist, well drained soils.

Comment: Long flowering. Shrubby in habit. Prune to keep shape.

***Pandorea pandorana* - Wonga Vine**

Height: climber to 6m

Aspect: Full sun to part shade.

Soil: Prefers moist, well-drained soils.

Comment: Excellent vigorous and showy climber for trellis.

***Patersonia occidentalis* - Long Purple-Flag**

Height: 8 - 55cm **Width:** 30 - 60 cm **Aspect:** Full sun to part shade.

Soil: Will grow in all soil types.

Comment: Attractive plant for rockeries, water features. Tolerated dry conditions.

***Pelargonium australe* - Austral Stork's Bill**

Height: 30 - 60cm **Width:** 0.3 - 1m **Aspect:** Full sun to part shade.

Soil: Prefers well drained to dry soils.

Comment: Hardy, water wise plant with splash of colour. Good for rockeries.

***Persicaria decipiens* - Slender Knotweed**

Height: 1m

Width: 60cm

Aspect: Full sun to full shade.

Soil: Prefers wet soils.

Comment: Leaves have dark blotches. Vigorous grower around edges of wet areas.

***Persicaria hydropiper* - Water-Pepper**

Height: 50cm **Width:** 30cm **Aspect:** Full sun to part shade.

Soil: Moist soils to shallow water conditions.

Comment: Annual herb with pink or white flowers. Leaves have hot peppery taste.

***Pimelea humilis* - Common Rice Flower**

Height: 10 - 50cm **Width:** 0.3 - 1m **Aspect:** Full sun to part shade.

Soil: Prefers moist, well-drained soils.

Comment: Dainty plant for small gardens, rockeries, and borders.

***Platylobium* species - Flat Pea**

Height: 0.4 - 1m **Width:** 1m **Aspect:** Full sun to part shade.

Soil: Prefers drier, well-drained soils.

Comment: Attractive plant for gardens.

***Poa ensiformis* - Purple-Sheath Tussock Grass**

Height: 30 -75cm **Width:** 90cm **Aspect:** Part to full shade.

Soil: Prefers moist soils

Comment: A vigorous grass suited to moist, shady areas.

***Poa labillardieri* - Common Tussock Grass**

Height: 30 - 80cm **Width:** 90cm

Aspect: Full sun to part shade.

Soil: Prefers moist to dry soils.

Comment: An attractive, vigorous, ornamental grass.

***Poa morrisii* - Velvet Tussock Grass**

Height: 40cm **Width:** 30cm **Aspect:** Full sun to part shade.

Soil: Prefers moist to well drained soils.

Comment: Attractive grass for borders, rockeries & landscaping.

***Poa sieberiana* - Grey Tussock Grass**

Height: 40cm **Width:** 30cm **Aspect:** Full sun to part shade.

Soil: Prefers moist to well drained soils.

Comment: Tussock grass for under trees, in rockeries and borders.

***Podolepis jaceoides* - Showy Podolepis**

Height: 30 - 60cm **Width:** 30cm **Aspect:** Full sun to part shade.

Soil: Prefers well drained soils with occasional dry periods

Comment: Showy daisy flowers for rockeries, containers & borders.

***Pomaderris aspera* - Hazel Pomaderris**

Height: 3 - 15m **Width:** 2 - 5m **Aspect:** Full to part shade.

Soil: Prefers moist to well drained soils.

Comment: Tall screen. Grows under trees. Cream flowers in clusters.

***Pomaderris racemosa* - Cluster Pomaderris**

Height: 2 - 5m **Width:** 1 - 3m **Aspect:** Full to part shade.

Soil: Prefers moist to well drained soils.

Comment: Screen plant under trees. Clusters of creamy/yellow flowers.

Prostanthera lasianthos* var. *lasianthos **- Victorian Christmas Bush**

Height: 2 - 10m **Width:** 2 - 5m **Aspect:** Full sun to part shade.

Soil: Prefers moist to well drained soils.

Comment: Tall fast growing screen with attractive lavender flowers.

***Pterostylis nutans* - Nodding Greenhood**

Height: 10 - 30cm **Width:** 10 - 20cm **Aspect:** Full to part shade.

Soil: Prefers Moist, rich soils.

Comment: Orchid with greenhood flowers shady, moist positions.

***Ptilotus spathulatus* - Pussy Tails**

Height: 10 - 30cm **Width:** prostrate **Aspect:** Full sun.

Soil: Prefers well drained soils.

Comment: Small attractive plant. Good for containers.

***Ranunculus inundatus* - River Buttercup**

Height: 5 - 30cm **Width:** 10 - 20cm **Aspect:** Full sun to part shade.

Soil: Requires wet areas or ponds. POND plant.

Comment: Beside wet areas or in shallow water. Frog attracting.

***Rubus parvifolius* - Native Raspberry**

Height: 0.6 - 1m **Width:** 0.5 - 2m **Aspect:** Full to part shade.

Soil: Prefers well drained soils.

Comment: A hardy scrambler which grows under trees. Habitat plant.

***Rytidosperma caespitosum* - Common Wallaby Grass**

Height: 20 - 40cm **Width:** 40cm **Aspect:** Full sun to part shade,

Soil: Prefers moist, well-drained soils.

Comment: Tufting plant with flower stems to 1m tall. Useful plant for re-vegetation and pastures. Can also be used in native grass lawns.

***Rytidosperma fulvum* - Wallaby Grass**

Height: 40cm **Width:** 40cm **Aspect:** Full sun to part shade.

Soil: Will grow in all soil types.

Comment: Tufting plant with flower stems to 70cm tall. Robust plant that can be used in native grass lawns.

***Rytidosperma geniculatum* - Kneed Wallaby Grass**

Height: 15 - 20cm **Width:** 30cm

Aspect: Full sun to part shade.

Soil: Will grow in all soil types.

Comment: Good plant for planting between pavers and in native grass lawns.

***Rytidosperma pallidum* - Red Anther Wallaby Grass**

Height: 0.4 - 1m **Width:** 30 - 50cm **Aspect:** Full sun to full shade.

Soil: Prefers well drained soils.

Comment: Attractive red anther grass for rockeries, paths, and walls.

***Rytidosperma racemosum* - Clustered Wallaby Grass**

Height: 20cm **Width:** 20cm **Aspect:** Full sun to part shade.

Soil: Will grow in dry to moist, well-drained soils.

Comment: Tufting plant with flower stems to 60cm tall. Plant can be used in native grass lawns.

***Rytidosperma setaceum* - Bristly Wallaby Grass**

Height: 30cm **Width:** 40cm **Aspect:** Full sun to part shade.

Soil: Will grow in all soil types.

Comment: Erect tufted plant that grows well with other grasses.

***Schoenoplectus tabernaemontani* - River Club Sedge**

Height: 1 - 2m **Width:** 20cm **Aspect:** Full sun to part shade.

Soil: Requires wet areas or ponds. POND plant.

Comment: Grows besides or in water. Good habitat plant.

***Scutellaria humilis* - Dwarf Skull Cap**

Height: 15cm **Width:** 1m **Aspect:** Full sun to full shade.

Soil: Prefers moist to well drained soils.

Comment: A dainty plant for shady sites. Spreads by layering.

***Solanum aviculare* - Kangaroo Apple**

Height: 1 - 3m **Width:** 1 - 4m **Aspect:** Full sun to full shade.

Soil: Prefers well drained soils.

Comment: Fast growing but short lived plant. Prefers some shade. Decorative. Fruit orange-red to scarlet when ripe.

***Solanum laciniatum* - Large Kangaroo Apple**

Height: 1 - 3m **Width:** 1 - 3m **Aspect:** Full sun to full shade.

Soil: Prefers well drained soils.

Comment: Fast growing, but short lived plant with well displayed flowers and fruits. Fruits orange when ripe.

Solenogyne gunnii

Height: prostrate **Width:** 20cm **Aspect:** Part shade.

Soil: Prefers moist, shady areas.

Comment: Perennial herb. Rosette shaped plant with greenish, tiny daisy like flower heads.

***Spyridium parvifolium* - Dusty Miller**

Height: 1 - 2m **Width:** 1 - 2m **Aspect:** Full to part shade.

Soil: Prefers moist, well drained soils.

Comment: Attractive flowering shrub with honey fragrance. Light screen for dry areas.

***Stylidium armeria* - Thrift-leaved Triggerplant**

Height: 0.2 - 1m **Width:** 20 - 30cm **Aspect:** Full sun to part shade.

Soil: Prefers moist to well drained soils.

Comment: Beautiful tufting plant for small gardens and containers.

***Themeda triandra* - Kangaroo Grass**

Height: 40 - 75cm **Width:** 0.7 - 1m **Aspect:** Full sun to part shade.

Soil: Prefers well drained soils.

Comment: Soft, erect or sprawling tussock. Excellent plant for feature planting due to interesting flower/seed heads.

***Triglochin procerum* - Water Ribbon**

Height: 20 - 50cm **Width:** N/A **Aspect:** Full sun to part shade.

Soil: Requires slow flowing waters. POND plant.

Comment: Aquatic in slow flowing water to 2m deep. Suitable for small ponds.

***Triglochin striata* - Streaked Arrow Grass**

Height: 10 - 20cm **Width:** 25cm **Aspect:** Full sun to part shade.

Soil: Requires wet areas or ponds. POND plant.

Comment: Grows in shallow water or around the wet edges of ponds.

***Veronica gracilis* - Slender Speedwell**

Height: 15 - 30cm **Width:** 1m

Aspect: Full sun to part shade.

Soil: Prefers moist to well drained soils.

Comment: Vigorous and dainty spreading ground cover.

***Veronica plebeia* - Trailing Speedwell**

Height: Prostrate **Width:** to 2m **Aspect:** Full sun to part shade.

Soil: Prefers moist to well drained soils.

Comment: Small matting plant with delicate violet flowers.

***Viminaria juncea* - Native Broom**

Height: 2.5 - 5m **Width:** 2 - 2.5m **Aspect:** Full sun to part shade.

Soil: Adaptable, will grow in moist to dry soils.

Comment: Fast growing. Prefers moist areas but adaptable. Most attractive when in flower.

***Viola hederacea* - Native Violet**

Height: Prostrate **Width:** to 2m **Aspect:** Full to part shade.

Soil: Prefers dryish to moist soils.

Comment: Excellent ground cover, forming a dense mat of violet flowers.

***Vittadinia cervicularis* - New Holland Daisy**

Height: 15 - 25cm **Width:** 10 - 15cm **Aspect:** Full sun.

Soil: Prefers disturbed, well drained soils.

Comment: An attractive plant for rockeries and containers.

***Vittadinia muelleri* - Narrowleaf New Holland Daisy**

Height: 10 - 30cm **Width:** 30cm **Aspect:** Full sun to part shade.

Soil: Prefers disturbed, well drained soils.

Comment: Dark blue flower heads for most of the year.

***Wahlenbergia communis* - Tufted Bluebell**

Height: 15 - 20cm **Width:** 20cm **Aspect:** Full sun to part shade.

Soil: Prefers moist, well drained soils.

Comment: An attractive plant for rockeries, containers, and in drifts.

***Wahlenbergia gracilis* - Sprawling Bluebell**

Height: 10 - 50cm **Width:** 1m

Aspect: Full sun to part shade.

Soil: Prefers moist, well drained soils.

Comment: Sprawling plant for over rockeries, cottage gardens and containers.

***Wahlenbergia multicaulis* - Tadgell's Bluebell**

Height: 10 - 80cm **Width:** 30cm

Aspect: Full sun to part shade.

Soil: Prefers well drained soils.

Comment: Attractive plant for rockeries, cottage gardens, and containers.

***Wahlenbergia stricta* - Tall Bluebell**

Height: 40 - 90cm **Width:** 30 - 40cm **Aspect:** Full sun to part shade.

Soil: Prefers well drained soils.

Comment: Well displayed flowers in drifts, small gardens, and containers.

***Xerochrysum viscosum* - Sticky Everlasting**

Height: 50cm

Width: 50cm

Aspect: Full sun.

Soil: Prefers well drained soils.

Comment: Perfect en masse in rockeries and cottage gardens. Prune after flowering.
